Lucknow, Uttar Pradesh 226028, India | +91 7235025629 | surajsinghsft@gmail.com | [Github](#) | [Portfolio](#)  | [Linkedin](#) |

Profile Summary

Motivated B.Tech CSE student skilled in Full-Stack Web Development (MERN Stack). Proficient in React.js, Node.js, Express.js, and MongoDB with strong understanding of Data Structures & Algorithms using Java. Experienced in developing scalable web applications, RESTful APIs, authentication systems (JWT/OAuth), and cloud deployment platforms like AWS and Vercel. Familiar with Agile methodologies and passionate about Problem-Solving, Software Engineering, and Artificial Intelligence.

Key Skills

- **Programming Languages:** JavaScript (ES6+), Java, Python
- **Frontend Development:** HTML5, React, Next.js, Tailwind CSS, Responsive Design, State Management (Redux/Context API)
- **Backend Development:** Node.js, Express, RESTful API Development, Authentication (JWT, OAuth2), API Testing
- **Databases:** MySQL, MongoDB, PostgreSQL (Indexing & Optimization)
- **Tools & Platforms:** Git, GitHub, Vercel, Netlify, AWS, Docker, Postman, VS Code
- **Core Skills:** Software Development Life Cycle (SDLC), OOP, Debugging, Agile/Scrum, Collaboration

Projects

AI Career Coach Project – [Live](#)

Developed an AI-powered career guidance web application to help users with resume analysis, interview preparation, and career planning. Implemented features like personalized career suggestions, mock interview support, and ATS-friendly resume feedback. Built a responsive and user-friendly interface for seamless experience across devices.

Tech Stack: React.js, Node.js, MongoDB, Tailwind CSS, REST API.

PrepAI – AI Interview Preparation Platform – [Live](#)

Developed an AI-powered interview preparation platform that helps users practice and improve their interview skills through smart question generation and real-time feedback. Built an AI-based interview preparation platform with mock interviews, personalized feedback, and role-specific practice features.

AI Blog Platform – [Live](#)

Developed an AI-powered blogging platform that enables users to create, manage, and publish blogs with smart AI-assisted content generation features. Built an AI-powered blogging platform with smart content generation, responsive UI, and dynamic blog management features.

Countries App – [Live](#)

Developed a responsive Countries Information web application that allows users to explore detailed information about countries worldwide. Implemented features such as country search, filtering by region, and dynamic display of population, capital, currency, and flag details.

Technical Experience

- Built multiple full-stack MERN applications with AI integration.
- Developed responsive user interfaces and RESTful APIs.
- Deployed projects on Vercel and GitHub Pages, Worked with Git/GitHub for version control and collaboration.

Education

- **Degree: B.Tech (CSE)** — Dr. A.P.J. Abdul Kalam Technical University (Aug 2022 – May 2026)
- **Intermediate:** (XII) UP Board (2022)
- **High School:** (X) UP Board (2020)

Certifications

- Full Stack Development with AI Integration — PW Skills (2026)
- Full Stack Development (React, Node.js, MongoDB, Express) — PW Skills (2025)
- Java with Data Structures & Algorithms — Apna College (2024)
- Getting Started with Enterprise Data Science — IBM (2023)

Achievements

- Solved 150+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks using Java.
- Contributed to open-source projects through GitHub pull requests and issue resolutions.
- Participated in hackathons and coding contests demonstrating teamwork and problem-solving skills.
